COMPETENCIES

Core: Power BI, Excel, AWS Cloud Architecture, Cloud Financial Operations, Java (OOP, DBMS), Spring (Spring, Spring Boot), Python, Reactive Core, Logging Tools (Kibana), Event-Driven Architecture (Kafka, Offset Explorer), Caching (Redis, Memcached), Database (SQL Server, MySQL, MongoDB, PostgreSQL, Hibernate), Selenium, HTML, CSS, Git, Github, Bitbucket, VBA

Sub: Elastic Search, C, JavaScript, Bootstrap, Front-end tooling (Figma), Laravel (PHP), Tableau, Jenkins

PROFESSIONAL EXPERIENCE

Accenture

Business Architecture Analyst (Cloud Architecture & Financial Operations), Nov 2024 – Present

- Managed end-to-end cloud billing processes, including Accenture to client chargebacks and SBU reports, ensuring 100% accuracy with zero disputes.
- Led quarterly rightsizing and cost optimization initiatives, identifying ~\$4,400 in potential monthly savings across AWS instances and storage.
- Designed and implemented an ETL pipeline for client data integration with Apptio, delivering early and enabling real-time cost impact tracking.
- Replaced assets feature in the EOL financial operation tool with a serverless solution using AWS Lambda, S3, and SNS to automate daily AWS inventory reporting.
- Led migration of Cloud & Security service performance deck to Power BI, guiding an intern through data logic, reporting structure, and stakeholder expectations to deliver a production-ready solution.
- Developed a custom Power BI dashboard to improve task visibility and team coordination, resulting in an estimated 20–30% improvement in team coordination efficiency.
- Automated ~50% of manual operational tasks (billing reconciliation and regular-basis reporting) using Python and VBA, boosting productivity by ~20%.
- Initiated and led enablement sessions on AWS CLI, Python, and serverless solutions; supported team in setting up local AWS development environments, improved overall team efficiency and task execution speed by ~10%.
- Identified six-figure annualised cloud savings through Savings Plan recommendations aligned with current usage trends, ensuring optimal coverage and maximum savings.
- Developed automation scripts to extend the Cloud Master Asset List (MAL) with public-facing IP information, improving cloud security visibility across the environment.

Blibli.com

Software Engineer Intern, Feb 2023 - Feb 2024

- Played a pivotal role in the seamless internal migration and development of the Content Management System (CMS) as a valuable member of the Homepage and Microsites team. Merged in a total of around 27600 lines of code.
- Demonstrated expertise in identifying and resolving up to 10 intricate bugs within the CMS and promotional pages, contributing to the overall stability and functionality of the platform.
- Involved in creating a new codeless configurable page named Exclusive Page, developed both CMS and front facing API.
- Took responsibility for handling more than 60 backend and QA Jira tickets showcasing a proactive and results-driven approach to addressing and resolving backend development tasks. Finishing tasks mostly took 10% less than expected time.
- Demonstrated versatility by seamlessly transitioning between roles as both a backend developer and Quality Assurance (QA) professional, contributing to a holistic and high-quality software development process.

CERTIFICATE

AWS Certified Solutions Architect - Associate

Amazon Web Services, Apr 2026

AWS Certified Cloud Practitioner

Amazon Web Services, Apr 2026

EDUCATION

BINA NUSANTARA UNIVERSITY, Jakarta

Undergraduate student in Computer Science, Sep 2020 – March 2024

- Cumulative GPA: 3.75/4.0
- Relevant Coursework: Computational Theory. Web Development: Frontend Development, Backend Development. Intelligent Machines: Perception. Database: Database Model, Data Queries (Data Manipulation Language and Data Definition Language), ERD. Computer Networking. Object Oriented Programming.

SMAK 3 PENABUR, Jakarta

Natural Science, July 2017 - May 2020

- GPA: 88.93/100.0
- Top 3 Best Student based on Highest Average Score in class for 3 consecutive academic periods.
- Active student in SMAK 3's Computer Club (2017-2020).
- Active student in SMAK 3's Math Club (2017-2018).
- Trained at Science Cub Jenjang BPK Penabur and has joined the National Science Olympics at Province level.
- Part of the P3K Committee at SMAK 3 Week (SMAK 3's cup) (2019-2020).

FREELANCING & VOLUNTEERING

SMAK 3 PENABUR PEDULI LINGKUNGAN, Jakarta

2017 – 2018

- Provided counseling and support to kids in national elementary school who were struggling of academic knowledge due to financial problem and bad quality in their school curriculum program. Evidenced by good score in tests and more understanding in basic general knowledges in Indonesian's curriculum programs including mathematics, physics, and English.
- Established positive, respectful, and appropriate mentoring relationships with participants.
- Supervised participants in learning both in academic and non-academic.

SUPERPROF

2021 - 2023

- Guided a 8th grade student in SMPK 2 Penabur to achieve better understanding in school especially in mathematics and physics.
- Made up to 60 pages of electronic instructional materials, assessments, and resources.
- Achieved success rate in teaching, evidenced by exam score average improvements by 5 points out of 10 points.

BINA NUSANTARA UNIVERSITY MENTORSHIP, Jakarta

2022

- Created and delivered instructional materials to support peers in university.
- Created electronic instructional materials, assessments, and resources.
- Attained above-average success rate in supporting peers proofed by all peers passed the 5th semester without any subject below B.

HIMTI Web Developer

2022 - 2023

- Joined an organization in Bina Nusantara University named HIMTI mainly focused in helping students who needed extra materials for IT courses.
- Develop HIMTI KIT website to provide students the software and material needed for courses based on their current semester both frontend and backend using PHP, HTML, and CSS in Laravel Framework.
